Benchmark’s MC-12 is the first and only compact microcentrifuge capable of achieving centrifugal speeds up to the critical threshold of 16,000 xg, often held as the standard for many molecular biology/DNA protocols. It’s brushless, maintenance free drive system makes it powerful, yet compact enough to allow each work station to be fully equipped with a personal centrifuge.

The MC-12 defines a new class of microcentrifuge: compact, quick, powerful and affordable. All aspects of microcentrifuge performance were taken into consideration and no compromises were made. In addition to its unsurpassed speed, the MC-12 also delivers shortened acceleration/deceleration times, whisper quiet operation and its computer-designed airflow pattern minimizes sample temperature increases during longer runs at high speeds.

All operating parameters are set using a single, conveniently located control knob and the large, bright LCD provides a clear indication of time and rpm or g-force. A separate momentary spin button permits instant spin downs, without setting or disturbing any preset parameters. The aircraft grade aluminum rotor accepts 1.5 to 2.0ml tubes directly, as well as 0.5 and 0.2ml tubes with optional adapters. For applications requiring sub-ambient temperatures, the MC-12 is cold room safe.

**Technical Data:**
- Speed: 15,500 rpm / 16,100 xg
- Capacity: 12 x 1.5/2.0 ml
- Deceleration: 10 seconds
- Acceleration: 12 seconds
- Increment: 100 rpm / 100 rcf
- Timer: 20 sec. to 99 min. / cont.
- Momentary: Yes
- Dimensions: 10.6 x 8.7 x 5.9 in.
- Weight: 27 x 22 x 15 cm
- Weight: 10.5 lbs / 4.8 kg
- Electrical: 115 to 230V, 50-60Hz, 100W

**Ordering Information:**
- C1612* MC-12 High Speed Microcentrifuge with 12 x 1.5/2.0 ml rotor, 115V
- C1008-A5-6 Adapters, 0.5ml, pack of 6
- C1008-A2-6 Adapters, 0.2ml, pack of 6

*115V with US plug. To order in 230V, add (-E) to the item number.
