

The BeadBug[™] 6 joins the large capacity BeadBlaster[™] 24 and personal sized BeadBug[™] as the newest member of the Benchmark homogenizer line.

Like the other members of the Benchmark Microtube Homogenizer family, the BeadBug 6 utilizes a three dimensional shaking motion to disrupt samples. This motion, when combined with beads of the appropriate size and material, causes high velocity impacts with the sample and is an extremely fast and efficient method for releasing cellular contents, including nucleic acids and proteins.

Many different sample types, from cells in culture to organ tissues and bone can be homogenized in the BeadBug 6, most within 45 seconds. Programming the unit is very simple - just set the speed, time, number of cycles and pause between cycles, then press start. For convenience, the last programmed parameters remain in memory for repeated runs.

Sealed tubes prevent cross contamination in the BeadBug 6. Samples are simply loaded into the tubes along with the beads and placed in the unit for processing. After homogenization, tubes are spun briefly in a centrifuge, and the lysate removed with a pipette.

Designed to fit the needs of medium throughput laboratories, the *BeadBug 6* can simultaneously process up to six samples in 2.0ml tubes. With optional adapters, the unit will also accept two 5.0ml tubes. A full range of bead materials and sizes are available in both prefilled tubes and in bulk to meet all your sample processing needs.

Technical Data

Capacity 6 x 2.0ml or 2 x 5.0ml*

Speed 4.00 to 7.00m/s in 0.05 increments Cycle time 0-90 seconds in 1 sec increments

Pause between cycles 0-90 seconds in 1 sec increments

Number of cycles 1-10

Acceleration/Deceleration ≤2 seconds Noise level <65db Ambient operating temp. +4° to 45°C

Dimensions (WxDxH) 22x35.5x20.5cm/8.6x14x8 in

Weight 9kg/20 lbs

100-240V, 50-60 Hz **Electrical**

Warranty *Requires 5ml adapters, sold separately

Ordering Information

BeadBug 6 Microtube Homogenizer D1036* D1036-A5 5ml adapters for *BeadBug 6*, set of 2

Tube Kits, prefilled with screw cap, 50 tubes/pack

Triple-Pure Zirconium, Ø 0.1mm, 2ml D1032-01 Triple-Pure Zirconium, Ø 0.5mm, 2ml D1032-05

D1032-10 Triple-Pure Zirconium, Ø 1.0mm, 2ml

D1032-15 Triple-Pure Zirconium, Ø 1.5mm, 2ml Triple-Pure Zirconium, Ø 3.0mm, 2ml D1032-30

Stainless steel, Ø 2.8mm, 2ml D1033-28

D1032-60 Ceria based Zirconium, Ø 6.0mm, 2ml

D1034-MX Mixed format for soil, 2ml

D1034-28 Stainless Steel, Ø 2.8mm, 5ml**

Empty tubes

D1031-T20 2.0ml tubes, pk of 1000

2.0ml tubes, pk 100, reinforced D1031-RF

C1005-SC5 5.0ml tubes, pk 500

Other bead types and bulk beads available. Call for details.

- *115V with US plug. For EU plug, please add -E to cat no.
- ** Requires the use of 5ml adapters, sold separately

Other members of the Benchmark Bead Homogenizer family: D2400 BeadBlaster 24, 24 x 2.0ml capacity
D1030 BeadBug, 3 x 2.0ml capacity
