

Products for COVID-19

Testing and Research

VORNADO™

Cat. # BV101

Less than 4" wide, this mini vortexer fits almost anywhere. Slight pressure starts operation. Available in 5 colors.

BENCHMIXER™ XL

Cat. # BV1010

Multiple tube racks allow for high throughput, hands free vortexing of samples. Racks available for transport/swab tubes.

MORTEXER™

Cat. # BV1005

Vortex tubes up to 50ml or 8 microtubes with the Multi-Head™ on this variable speed vortexer. Touch or continuous operation.

NUVA CLEAN™

Cat. # P5590

nUva Clean Pipette Stand bathes pipette shafts in germicidal UV-C light to help eliminate sample contamination.

MC-24 TOUCH

Cat. # C2417

24x1.5/2.0ml tubes or 2 PCR strips are accommodated in one rotor by this touch screen microcentrifuge. Max 16,800 xg.

LC-8 Plus™

Cat. # C3200

15 ml conical tubes, 5-15ml blood tubes and transport/swab tubes are accommodated by the 8 position rotor in the LC-8 Plus. Max 5000rpm-3070xg.

PLATEFUGE™

Cat. # C2000

Quickly spin down droplets in plates. Accepts PCR plates, microtiter plates up to 25mm tall and 24x0.2ml PCR strips.

HERMLE 2306

Cat. # Z306-BND-MP

Compact, universal centrifuge accepts up to 6 microplates in the supplied swing out rotor. Eight additional rotors available for tubes and bottles up to 145ml.
